

W11-Team: User Stories

Team number and name: Team 8 “AppBundle”

Names of students who actively worked on this assignment:

- Student 1: Sharwari Makarand Gothe
- Student 2: Swamy Honnebagi Mallappa
- Student 3: Hongyu He
- Student 4: Fengtian Guo
- Student 5: Minxuan Hu

Story 1:

Secure and robust storage service

“As an active investor, I want to be up to date with my data and keep it safe all the time which requires the use of multiple apps so that I can use as many resources as required without worrying about the safety and memory”

Acceptance criteria:

- Robust and concurrent data storage
- Fast processing
- Easy to store

Definition of done:

- Able to install multiple apps of different banks and investing agencies
- Almost as if working on the internal phone memory
- Customizable as per the requirements

Story 2:

Easy and Fast Access to Data

“As a dietitian and gym instructor, I want to be well acquainted with the latest trends and diets in the market so that I can train more people to live a healthy life which requires use of multiple health softwares to be installed in my smartphone”

Acceptance criteria:

- Save data spent in storing diet plans
- Preserves the confidentiality of the client
- Data available from any location when working remotely

Definition of done:

- Pay for what you use
- Flexibility to change the features
- Scalability without any overhead

Story 3:

Good facility with excellent quality

“As a music connoisseur, I want to go deeper into the details, technique, or principles of music that I listen to, so that I can enjoy and pursue my passion to its full extent.”

Acceptance criteria:

- Allows music storage along with my data without hampering the quality
- Stores the entire application along with data while maintaining a good speed
- Good collaboration efficiency with other like minded individuals

Definition of done:

- Good music streaming at all times
- Good backup system and secure from any disaster recovery
- Less conflict with legal issues due to well maintained transparency

Story 4:

Staunch Storage

“As an avid traveller, I want to take photos and make short videos which require a high end phone with large space to store them with high quality so that I don't need to carry extra storage devices”

Acceptance criteria:

- Quality of the storage
- High security to store sensitive content
- Compress large video files.

Definition of done:

- Free up internal space
- Bug fix and app update
- Leveraging the file compression with the quality

Story 5:

Prefer Mobile Apps over Websites

“As a Tech savvy, I want to read news, check social media, reply to emails, browse, read e-books, listen to music, play games, and watch movies to get some entertainment on my phone so that I can complete most of the things on a smartphone”

Acceptance criteria:

- Frequently used app data on cloud
- Auto Update to have a latest security
- Speedy upload and access

Definition of done:

- Storing the data and change required things and sync
- Good security protocol standards
- Real time upload and sync

Story 6:

Access Cloud Storage

“As a developer, I want to upload and sync all files and data across my laptop, mobile, tablet for which I could sync everything to the cloud and can access it from anywhere so that i stay connected all across my devices and will reduce multiple copies and storage on my devices”

Acceptance criteria:

- Cloud Subscription
- Auto Backup and Sync
- Choose Apps for auto sync

Definition of done:

- Fully functional subscription with all the features
- Access uploaded data without disruption
- Maintain uploaded file security

Story 7:

Cloud storage backup service

"As a frequent user of mobile apps, I need more memory space instead of deleting files or apps every time I run out of memory, so that I don't need to buy a new phone or worry about poor use of my phone due to insufficient memory"

"As someone whose work is closely tied to my phone, I need services that automatically backup files or information to the cloud whenever and wherever possible, so that I don't have to remind myself to save the backup locally every time"

Acceptance criteria:

- Apply for a cloud account
- Automatic monthly payment
- Free trial for the first week and Free storage on cloud for 5GB
- Reminder of renewal at the end of the term

Definition of done:

- Fully working process of storing files to the cloud
- Testing of each uploaded backup standard
- Payment security is fully developed

Story 8:

Reliability

"As a mobile phone user looking for storage with high reliability, I need to use the cloud product without worrying about my file security, so that I don't have to re-upload and back up files if I find them missing or wrong"

Acceptance Criteria

- Priority Tracking service
- Optional refund of the month fee

Definition of done:

- Constant tracking
- Real time updates on account

Story 9:

Affordable capacity expansion

"As a mobile game player, I want a more economical solution to get more memory space so that I can afford more memory space to play games."

"As a student, I need more sufficient funds and income sources and new economically feasible solution so that I can ensure I have enough budget for storage and everything in my daily study and life work smoothly "

Acceptance Criteria

- Mutual benefit policy - recommend to friends, new users and yourself to get free 5GB of cloud storage space
- Post positive advocacy experiences and reviews on the platform and get a small amount of free cloud storage
- Discount for members who subscribe for more than one year

Definition of done:

- Use the cloud platform for mutual benefit
- Real time Discount Updates on account

Story 10:

Phone storage issues

“As a mobile game enthusiast, I want my phone to have more storage space so that I can buy large-capacity games and easily cache large amounts of data while playing”

Acceptance Criteria :

- Guaranteed cloud storage space
- Ensure real-time storage of users' information and data in the cloud
- Applications stored in the cloud can work normally without loss of operating speed

Definition of done:

- Mobile application running in the cloud test
- Customer satisfaction surveys
- Improvements made by the technical team for storage space and transmission efficiency

Story 11:

Security and convenience of data storage

“As a worker in the financial industry, I want cloud storage to be highly secure so that I can often trade with customers on my mobile phone and share information securely, as well as keep some key confidential data on my phone.”

Acceptance Criteria :

- Guaranteed data will not be lost or damaged
- Specify that only visitors with special permissions can view data in the cloud
- Authentication of data sharing parties
- Confidentiality and integrity of data information transmitted through the cloud

Definition of done:

- Regular testing of product safety
- Maintenance of confidentiality and integrity of cloud data storage and transmission
- Show features to customers in the application demo

Story 12:

Diversified payment plans

“As a student, I want to have some reasonable cloud service plans for student charges so that I don't have to face the lack of storage space often, the cost of cloud services is too high, and most services are for a single user.”

“As a photographer, I want to share data in the cloud service and ensure the security of the data in the transmission data so that I can often store a lot of photos in the mobile cloud service and avoid a series of tedious operations when choosing a cloud service to share photos.”

Acceptance Criteria :

- Make adjustments to specific cloud service plans based on the needs of different users
- Provide different price points and multiple types of cloud service solutions. Let users choose freely
- Allows multiple payments for a single cloud service plan based on the provision of specific identification

Definition of done:

- Provide affordable fee plans
- Demonstrate the features that users can choose to customize cloud services
- Strict identity control for groups with multiple people sharing cloud services
- Real-time monitoring of the use of multi-person shared cloud services to avoid losses caused by system management vulnerabilities

Story 13:

Storage Space limited my talent

“As a fan of photography, I want to have more storage space so that I can store more photos during the weekend or vacation with my family or friends”

“As a mobile gamer, I want to have more space for my game so that I can try or play more games on my phone”

Acceptance criteria:

- Selecting a suited storage cloud plan.
- Have a free trial period.

Definition of done:

- Testing a storage range of cloud plan
- Build mutual trust between user and company

Story 14:

Storage Security and space

“As a businessman, I want to store a lot of data and investment information and photos on my phone and keep every information and my photos in a reliable storage space so that I can make my investment easier and share photos with my family and friends”

Acceptance criteria:

- The flexibility of using data
- The security rate of service

Definition of done:

- People will own more flexibility about the method of using their storage. When something is unnecessary at that moment, people will have the ability to choose this thing they will keep in their phone storage. When something is useful, people will have the ability to keep it on their phone. The purpose is to keep more free space on phones.
- Knowing the capability of security rate.

Story 15:

“As a Student, I want to have more storage space or reasonable price cloud service, so that I can save plenty of course materials and reading sources, and save money”

Acceptance criteria:

- Provide a highly cost-effective price for cloud service
- Provide different plans for different groups of people. Such as students, business people.

Definition of done:

- Give a competitive price to attract users to use the app.
- Customizing plans. The purpose is to attract people's eyes and give a good impression.
